Pitch

- I am an enthusiastic and adept Backend Engineer, eager to make meaningful contributions to team achievements. With a demonstrated history of transforming ambitious concepts into smooth, high-performance digital solutions, I am thrilled about the prospect of sharing my skills with your organization.

Core Competencies

- Server-side Programming:
  Proficiency, Node.js
  Ability to write efficient, scalable, and maintainable server-side logic code.
- Database Management:
  Expertise in both relational (e.g., MySQL, PostgreSQL) and NoSQL databases (e.g., MongoDB).
  Designing and optimizing database schemas, writing complex queries, and ensuring data integrity.
- API Development:
  Creating and maintaining RESTful APIs for seamless frontend-backend communication.
  Implementing secure and efficient methods for data exchange.
- Performance Optimization:
  Identifying and resolving performance bottlenecks through code optimization, caching strategies, and server configuration adjustments.
  Monitoring and analyzing system performance for optimal functionality.
- Testing and Debugging:
  Writing unit tests and conducting thorough debugging to ensure backend system reliability and stability.
  Familiarity with testing frameworks and debugging tools.

Education

- **Tai Solarin University of Education**   September 2016 - June 2021
  Bsc Computer Science
  3.54/5 CGPA

- **Lireni College, Lagos, Nigeria. [2007- 2013]**   2007-2013
  West African Senior School Certificate Examination

- **Queenmaris Primary School, Lagos, Nigeria.**   2001-2007
  Primary School Leaving Certificate Examination

Experience

- **Humanatic (Remote)**   December 2021 - Till date
  Customer Service Call Reviewer
  - Analysis of calls handled by qualified agents.
  - Data collection of calls presenting business opportunities.
  - Data sorting of customers enquiries, complaints and service requests.
